

How to Change Application's Font Settings?

Written Date : August 16, 2010

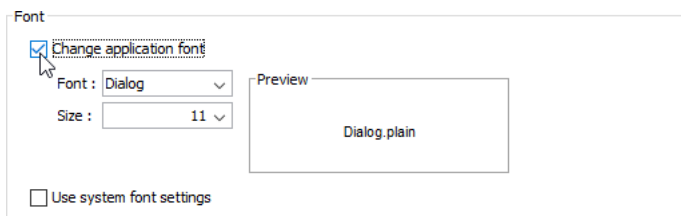

1. After launching Visual Paradigm, select **Window > Application Options** from the application toolbar to open the **Application Options** window.

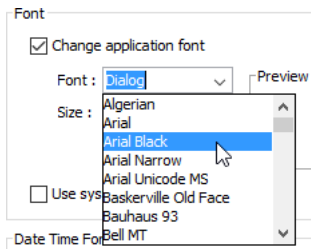

2. In the **Application Options** window, select the **General** page and open the **Appearance** tab.

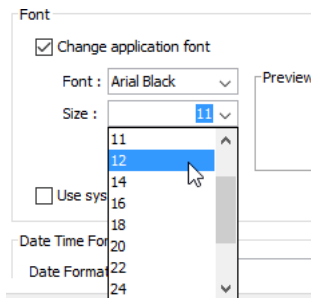

3. Check **Change application font**.

- Now, you can change the font and its size. Select **Arial Black** from the drop-down menu of **Font**.

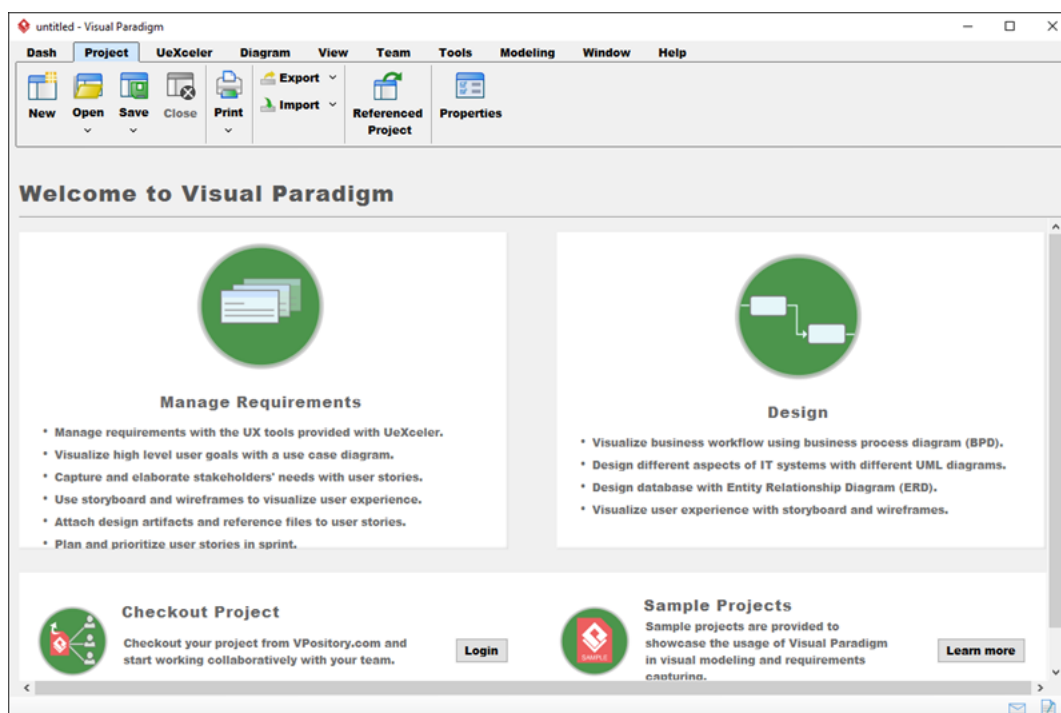

- Select **12** from the drop-down menu of **Size**.

- Click the **OK** button in the **Application Options** window.
- In the pop-up **Message** dialog box, click the **OK** button. It notifies you to restart the application.
- Restart the application.

9. As you can see in the application, the font style and size are changed as below:
